Second Announcement

Dear Colleagues,

We would like to draw your attention to the forthcoming International Symposium on Geometric Function Theory and its Applications (GFTA 2008) which will be held at Universiti Kebangsaan Malaysia during November 10-13, 2008. The symposium has been brought into attention since 2007 where TC Istanbul Kültür University was the host of the previous such symposium. The School of Mathematical Sciences, Universiti Kebangsaan Malaysia is honoured to be given the chance to organize it for 2008. The symposium is jointly organized with the Malaysian Mathematical Sciences Society (PERSAMA) and Kinki University, Japan. The aim is to bring together leading experts as well as young researchers working on topics mainly related to univalent functions and Geometric Function Theory with applications in various area of mathematics, and to present their recent work to the mathematical community. English is the official language of the symposium.

Main Topics:

- Univalent Function Theory
- Conformal and quasiconformal mappings
- Fractional calculus
