

WORKSHOP ON HUMAN LONGEVITY

Unraveling the Secrets of Human Longevity

26-27 November 2007

Universiti Kebangsaan Malaysia
(UKM)

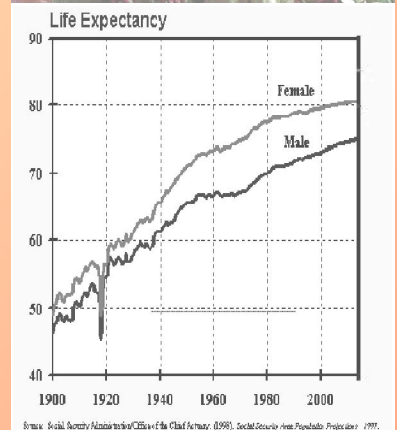

Longevity is the length of a person's life. Complex mechanisms of genetic dispositions, early life conditions, current lifestyles are important causes in determining individual's life span. This workshop is intended to provide a broad overview of bio-demographic ideas, models, methods, and findings regarding human aging, mortality and longevity incorporating interdisciplinary approach. The aims are to bridge the gap between biological, mathematical and social sciences as well as nurturing the understanding and collaboration amongst the regional and global human longevity scientists and practitioners. Besides that, it also aims to demonstrate the vital role of understanding the mechanisms of aging and longevity and to extend healthy and productive human lifespan. The workshop will include several sessions and discussions on longevity, demography, genetic factors and others. We cordially invite academicians, researchers, scientists and interested parties to join this event in the serene campus of Bangi, Malaysia. We are also proud to inform you that 2007 is the official Visit Malaysia Year !

THE SPEAKERS

Dr. Leonid A. Gavrilov and Dr. Natalia S. Gavrilova are the world's leading experts in longevity studies, and the authors of a well-respected scientific book "The Biology of Life Span", listed in the Encyclopedia Britannica as a recommended reference. Both of them are the authors of over a hundred of scientific publications on related topics, which received coverage in Science, The Scientist, The New York Times, Los Angeles Time, Sunday Times London, The Guardian (UK), Reuters and The Independent (London). Dr. Gavrilov is the Principal Investigator of the scientific project "Biodemography of Human Longevity" funded by the National Institute on Aging (USA). Dr. Gavrilov has also given scientific lectures worldwide. For more information, please visit the following website:

ICMS'07

Participants of the workshop are also invited to attend or present their papers on longevity at the International Conference on Mathematical Sciences (ICMS) on the 28th and 29th of November 2007. Parallel sessions on longevity will be held on the 28th. For further detail, please visit : <http://pkukmweb.ukm.my/~ppsmfst/icoms>
